

# the *Timeless* Beauty of GREECE

Greece is a mountainous country marked by beautiful islands and a rich history. From Mt. Athos to Santorini, the people of Greece indulge in their love for nature, relaxation, and especially coffee. Thessaloniki, is the second largest city in Greece and acts as the capital of Greek Macedonia. In contrast to the islands, it is much more metropolitan and is home to thousands of college students. Although Greece is commonly known for the Parthenon and Ancient Greek mythology, more recent news focuses on its economic state and its participation in assisting refugees. Studying abroad in Greece turned out to be a special and beautiful experience of cultural immersion.
